CGPA – 7.74

PROJECTS

Doctor Appointment Booking Project — *Built using HTML,CSS and JS*

Created a Doctor Appointment Booking website using HTML, CSS, and JavaScript. The website allows users to search for doctors, view available appointment slots, and book appointments online. It features a clean and responsive design that works well on both desktop and mobile devices. Key functionalities include a user-friendly interface, doctor profiles, appointment scheduling, and confirmation notifications, providing an efficient solution for patients to manage their healthcare appointments.The project is deployed using GitHub Pages, making it easily accessible online.Link

Travel and Tours Website Project — *Build using HTML,CSS,JS*

Developed a responsive Travel and Tours website using HTML, CSS, JavaScript, and React JS. The website features a dynamic and interactive interface with detailed destination information, advanced search and filtering options, and optimized performance for a seamless user experience on both desktop and mobile devices. The project files are uploaded to a GitHub repository for easy access and version control.Link
